## New Employee Classification Assignment

**Workers Compensation Codes** are a complicated compilation of job definitions designed to accurately identify various workplace exposures. Each specific job classification is assigned a four-digit number which is then used throughout the workers compensation system. These systems of codes are known as classification codes. Classification codes are a primary part of the workers compensation pricing mechanism. Each workers' comp code has its own rate for the purpose of calculating premium on a policy. Proper classification of your business can save thousands of dollars in the workers comp premium paid.

### Instructions:

1. Upon receipt of a new employee's payroll, our system will send an email to the primary billing contact, listing the new employees' names and including a Classify Now link.

**E-COMP **
